PROFESSIONAL SUMMARY

Third-year Computer Science undergraduate with strong problem-solving skills demonstrated through 500+ DSA problems and competitive programming. Passionate about full-stack web development with experience building scalable web applications using React, Node.js, Express, and modern software engineering practices. Currently developing DevMatch, an intelligent student collaboration platform featuring adaptive team matching and recommendation algorithms.

EDUCATION

Jaypee Institute of Information Technology (JIIT), Noida, | B.Tech (CSE)

2024 – 2028

• CGPA: 8.2 | Core Courses: OOPS, Data Structures, DBMS

DAV PUBLIC SCHOOL | CBSE

• Class X (2022): 93.5% | Class XII (2024): 87.6%

• Developed a Python-based GUI using Tkinter, Matplotlib, NumPy, and Pandas to visualize SNR and probability of detection. • Enabled radar sensitivity analysis through MATLAB–Python integration and automated data workflows for result visualization.

PROJECTS

Tele-Medicine Web Application | Full Stack Project | [GitHub](#)

- Built a web platform enabling online doctor–patient interaction and appointment management.
- Implemented front-end user interfaces and back-end server logic using modern full-stack technologies.
- Developed features for user authentication, data handling, and healthcare service workflows.
- Tech Stack: HTML, CSS, JavaScript, Node.js, Express.

DevMatch – Intelligent Student Collaboration Platform | Full Stack Project | [GitHub](#)

- Designed and developed **DevMatch**, a full-stack platform that enables students to discover teammates and build software projects through intelligent skill-based matching.
- Engineered an **Adaptive Team Matching Engine** that ranks developers using customizable project priorities such as technical skills, availability, experience, communication, and collaboration history instead of fixed scoring.
- Implemented secure authentication, developer profiles, project creation, invitation workflows, and team management using RESTful APIs and JWT-based authorization.
- Designed scalable database models for users, projects, invitations, and team relationships while following MVC architecture and modular React component design.
- Developed an explainable recommendation dashboard that presents overall compatibility scores along with category-wise strengths, enabling project owners to make informed team selection decisions.
- **Tech Stack:** React, JavaScript, Node.js, Express.js, MongoDB, JWT, Git, GitHub

SKILLS

Languages: C++, JavaScript (ES6+), Python, SQL
Frontend: React.js, HTML5, CSS3, Responsive Web Design
Backend: Node.js, Express.js, REST API Development
Database: MongoDB, MySQL
Authentication & Security: JWT Authentication, bcrypt.js
Developer Tools: Git, GitHub, VS Code, Postman, MongoDB Compass
Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, MVC Architecture
Currently Learning: TypeScript, Docker, PostgreSQL

ACHIEVEMENTS & CERTIFICATIONS

- **Problem Solving:** Solved **500+ DSA problems** across LeetCode (300+), GFG (150+), and C.P. (50+).
- **Competitive Programming:** Achieved **Contest Rating 1524** on LeetCode (Top 30%) and **1-Star (1193)** on Codechef.
- **Technical Discipline:** Earned **100 days badge** on LeetCode and completed the **GFG 160 2025** Challenge.
- **Certification:** Full-Stack Web Development Bootcamp | Advanced Learning Algorithm
